EDGE Starts!

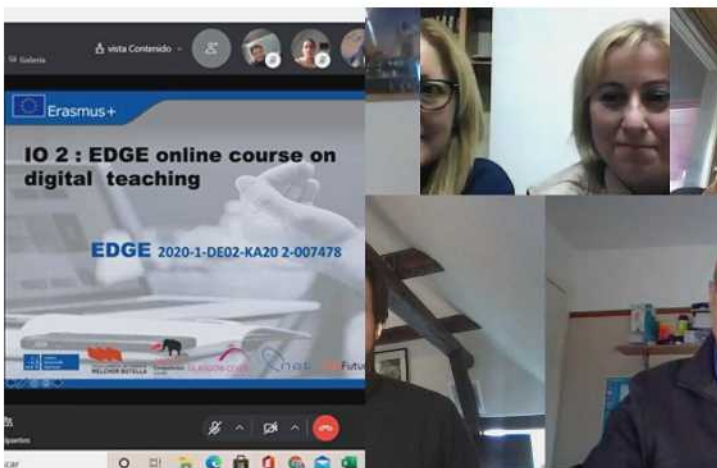

The first meeting of the EDGE (Empowering Digital Teachers) was held on 29 January 2021. On this occasion we had the opportunity to get to know the different points of view of the participating partners. The comparison and study of the different local contexts were fundamental to put down roots and to find the best digital teaching skills.

This newsletter is a regularly distributed publication which generally concerns the **news of the EDGE project.**

This allows a detailed view of the activities of the participating partners in the various local contexts.

OVERVIEW:

- Starting of the project Empowering Digital Teachers
- Objectives of project
- Meeting about the latest revision of the guide
- First in presence Meeting in Mestre

OBJECTIVES

ENHANCE THEIR DIGITAL TEACHING SKILLS

The EDGE project will allow teachers to build on their existing experience and embed proven digital teaching & learning strategies in daily practice. They'll learn how to design, develop, implement and validate active learning methodologies based on digital technologies

IMPROVE THEIR CONFIDENCE

There is a lot to think about when implementing digital technologies with classes. The EDGE project will provide teachers with a jargon free guide and targeted training to help them understand the benefits of using technology with the pupils.

AN INNOVATIVE TRAINING PATH FOR YOU

The EDGE project will help teachers explore the benefits of using digital skills, show how to get started with their own virtual learning environment (VLE) or help them make the best of their existing VLE. EDGE will help meet students' expectations and advance their school's practice.

LATEST REVISION OF THE GUIDE

On the 30th of June a second meeting was held by the EDGE (Empowering Digital Teachers in a changing world) team. At this meeting the latest revision of the guide was shared. Soon it will be made available to the teachers.

FIRST IN PRESENCE MEETING

The pandemic of Covid-19 really impacted the project EDGE. For many months it was impossible for the team to meet. Several online meetings were held and, fortunately, the project was able to continue.

But eventually, in October, we managed to meet in presence in Mestre (Italy) for the 1st time and discuss the next steps. The guide, the courses, communication and dissemination were in the agenda of the meeting.
